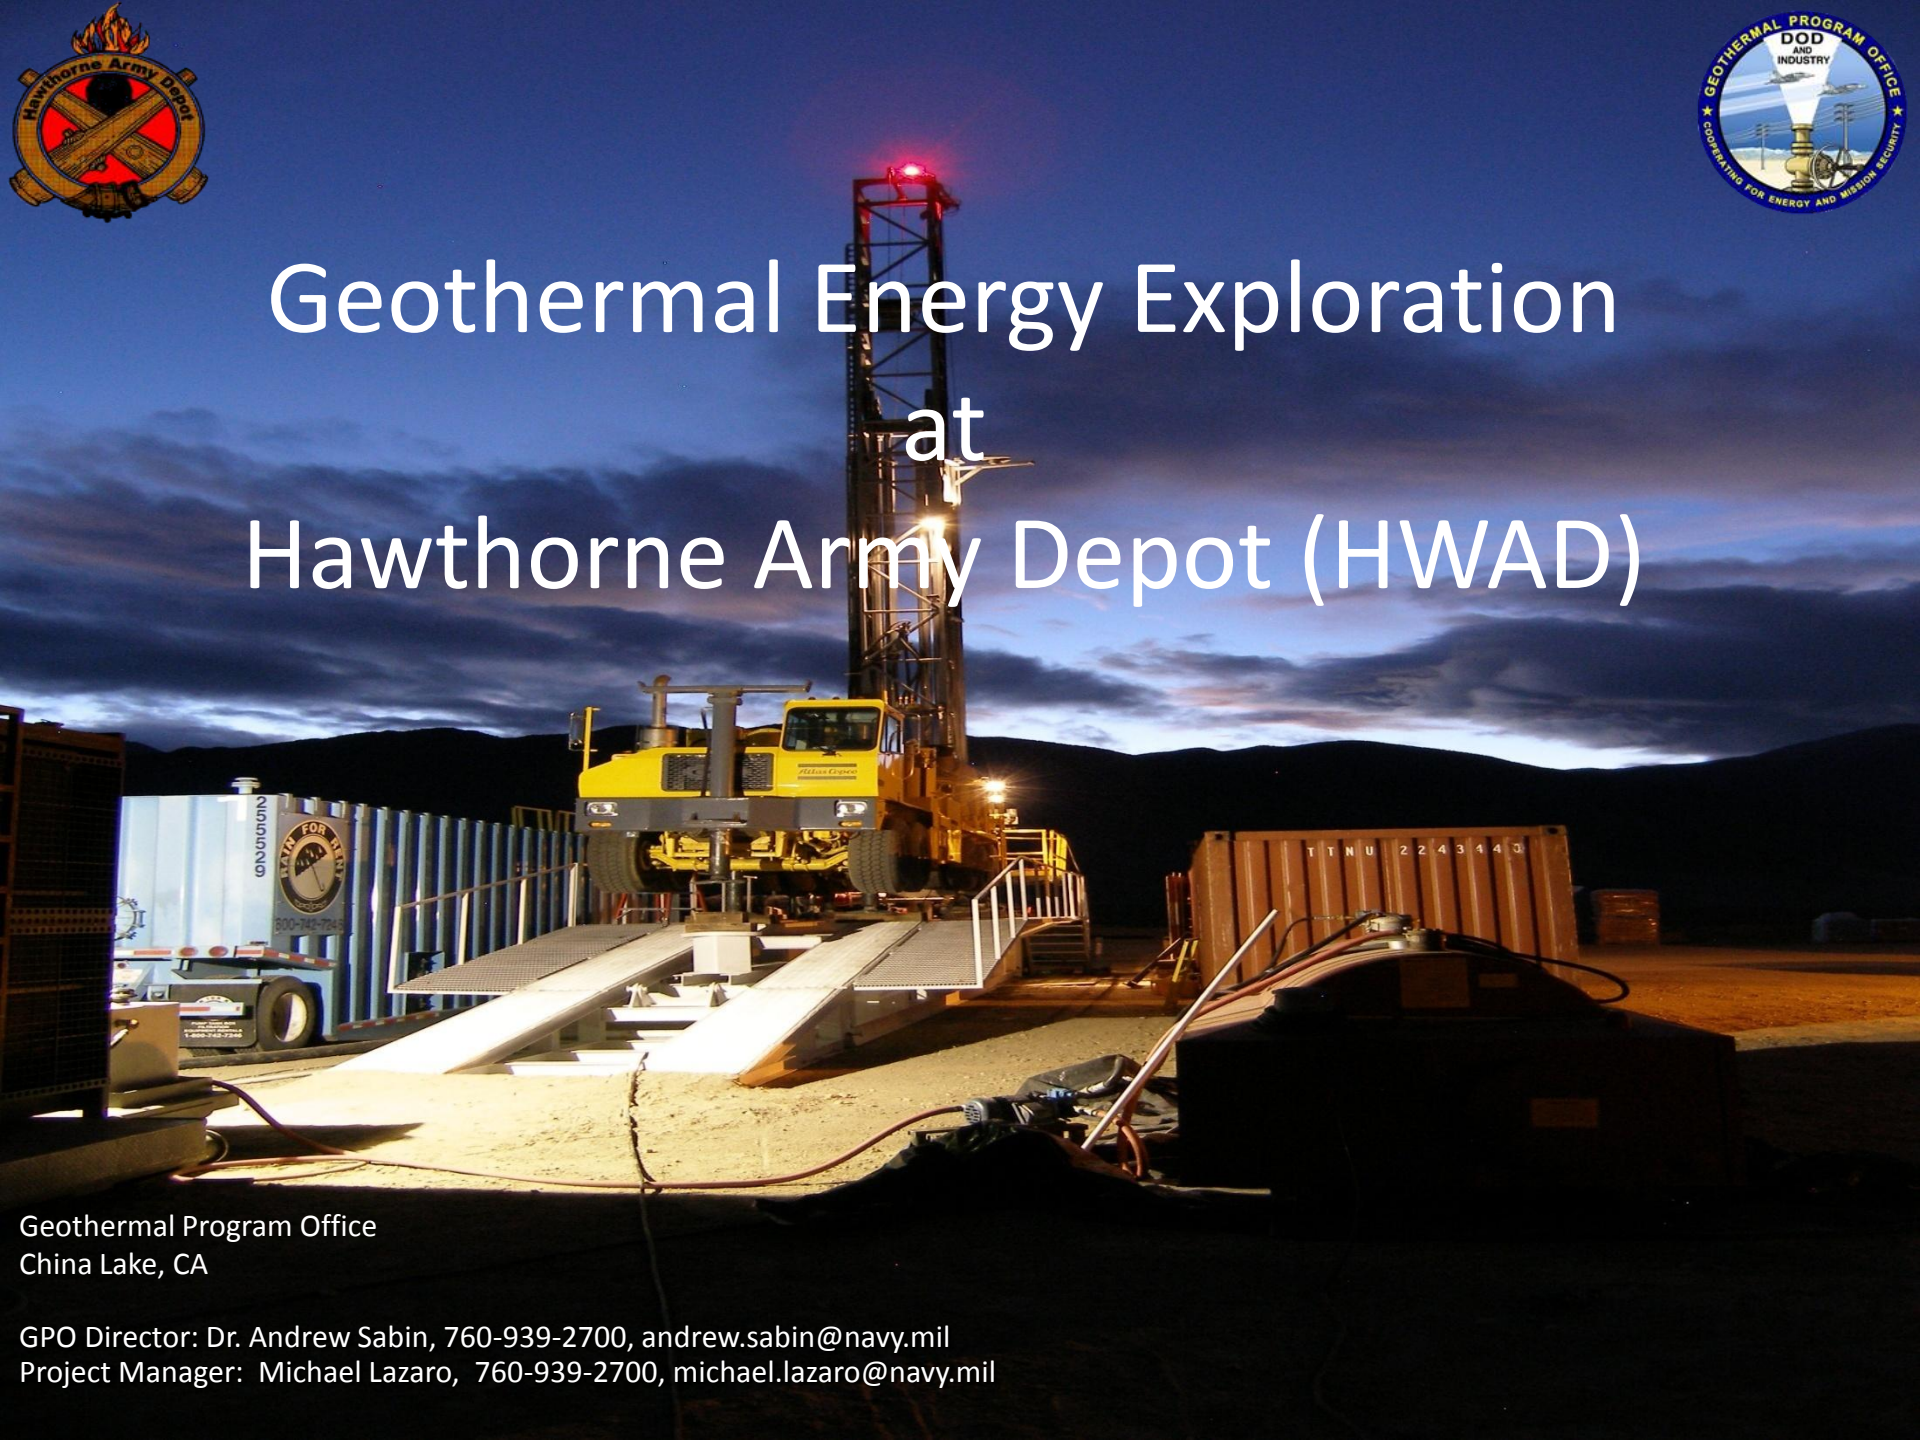
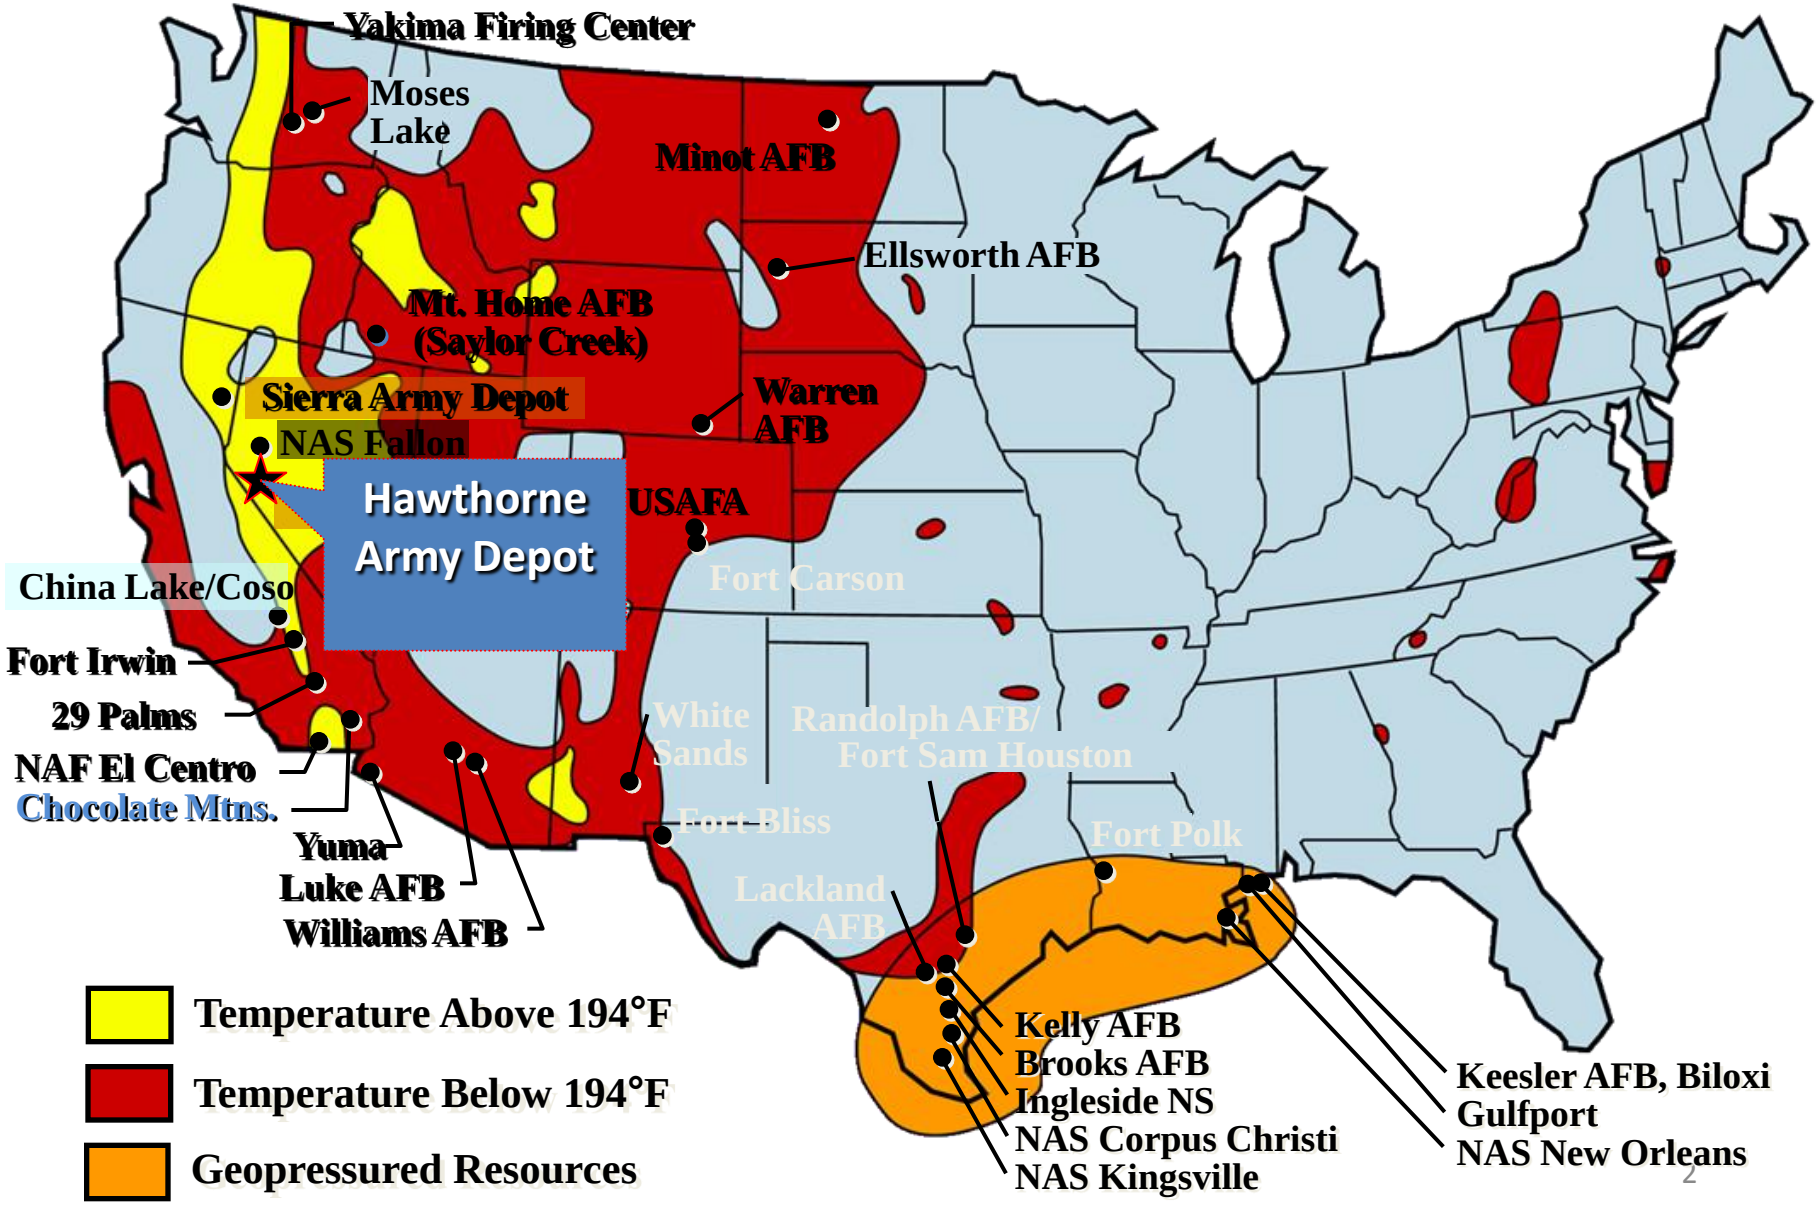
Geothermal Energy Exploration at Hawthorne Army Depot (HWAD)



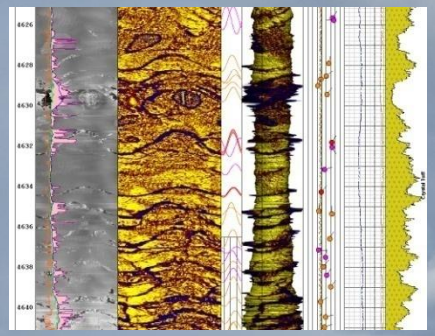
Geothermal Program Office
China Lake, CA

GPO Director: Dr. Andrew Sabin, 760-939-2700, andrew.sabin@navy.mil
Project Manager: Michael Lazaro, 760-939-2700, michael.lazaro@navy.mil

Military Geothermal Resources



GPO Exploration at HWAD



Down-hole acoustic image

HWAD #2a

- Elevated Shallow Temperatures
  - ✓220 deg F @ 1000’
  - ✓236 deg F @ 2500’
  - ✓ Reveals commercially viable resource

The Geothermal Program Office (GPO) has conducted exploration activities to locate a potential geothermal resource within the 147,000 acres of HWAD. GPO has conducted gravity and ground magnetic surveys, a 3-D seismic survey and interpretation, and has drilled 2 deep, slim holes.

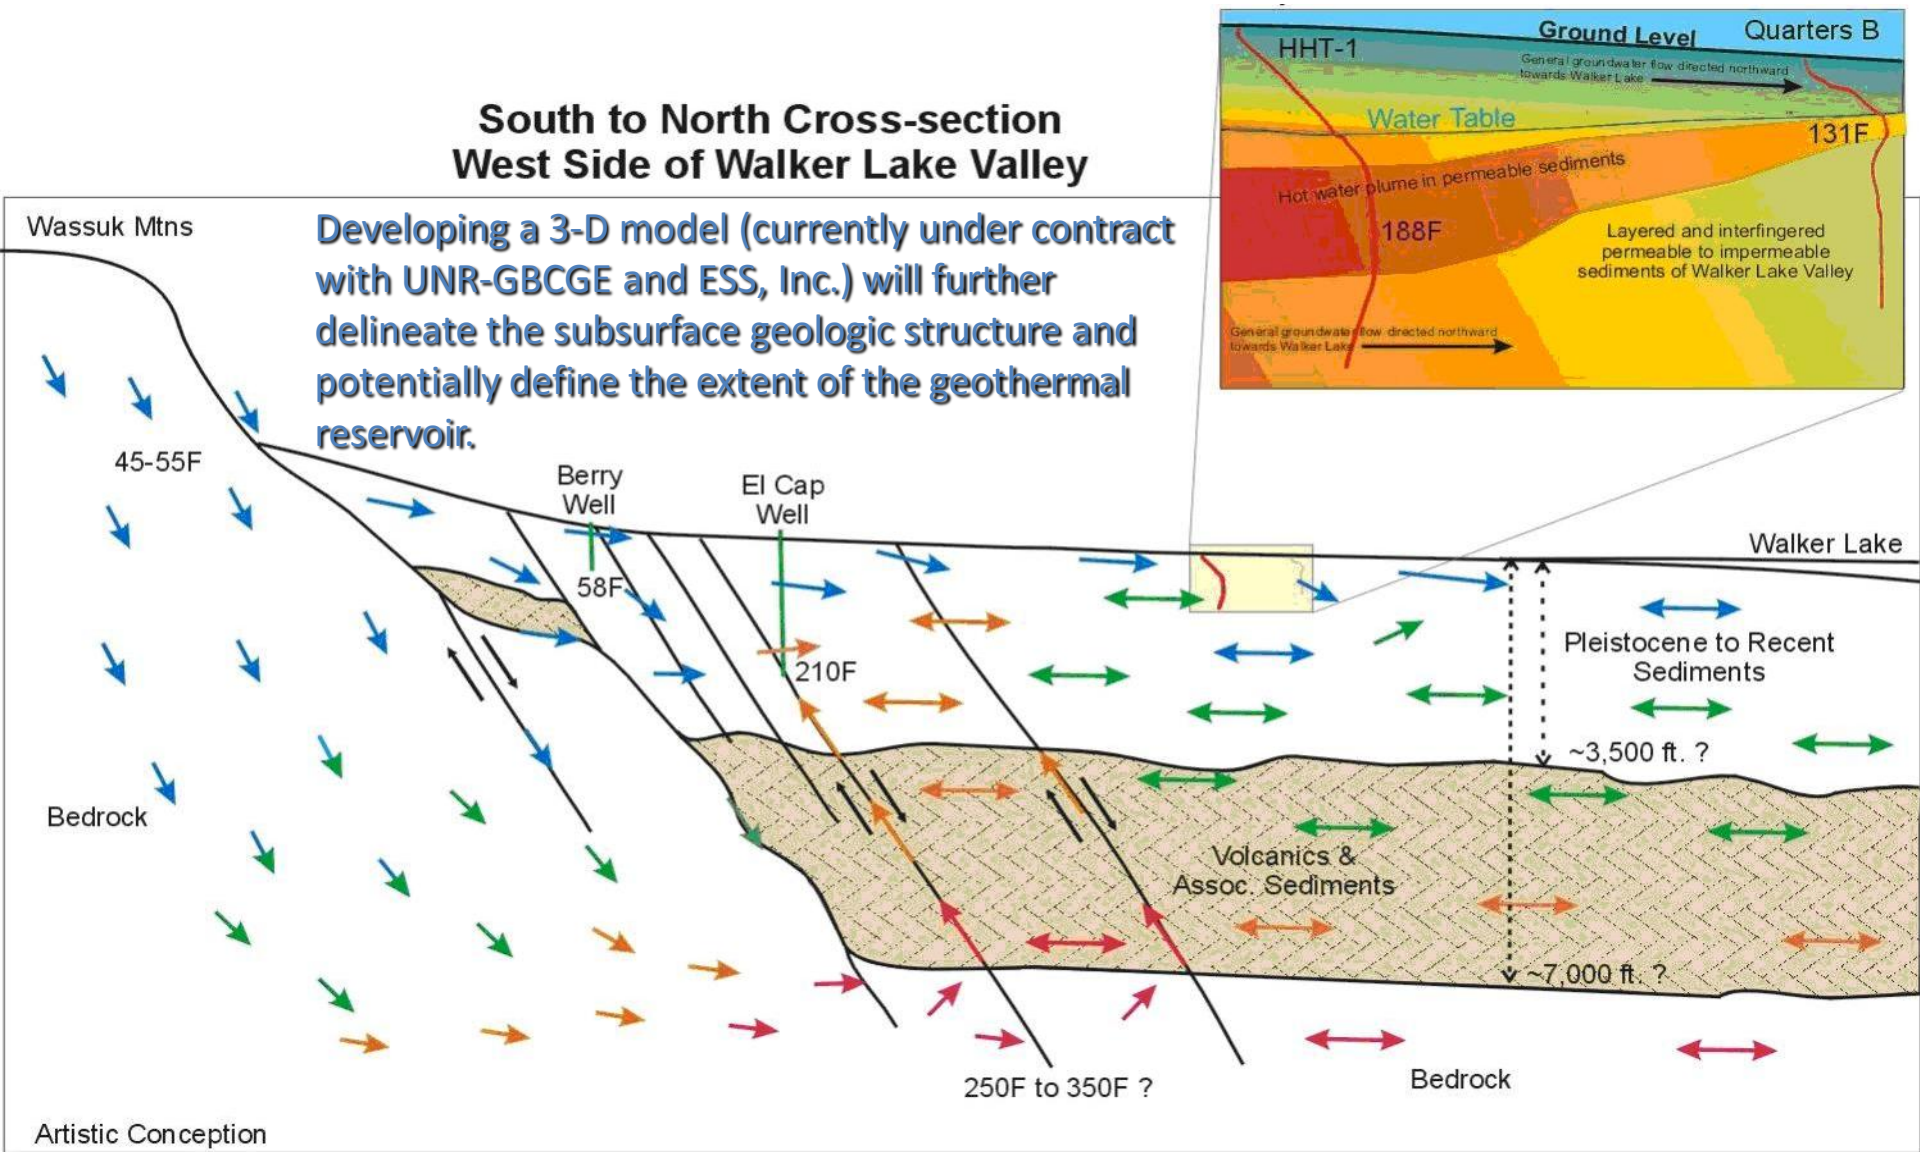
Milestones

- MOA between Department of the Army and Department of the Navy signed 12/7/2009
- Department of the Navy will:

  - Provide Technical Assistance with Geothermal Project Contracting Strategy
  - Assist Army in conducting any industry forum and prep of solicitation
  - Consult Department of the Army throughout the PPV contracting process
  - Maintain resource management expertise and oversight of geothermal project to ensure long-term energy
  - Monitor and report on condition of resource and provide monthly revenue reports

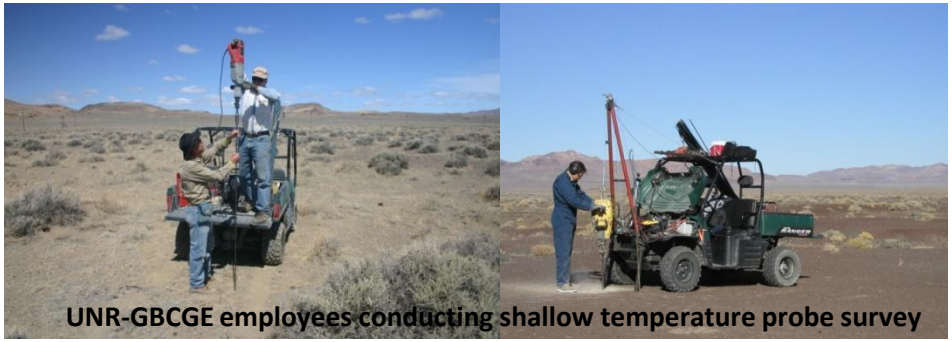
Geologic Modeling



Current/Future Exploration

Current Exploration

- Synthesize data/create a complete 3-D Geologic model
- Establish shallow and intermediate/deep drilling targets from synthesized data and geologic model



UNR-GBCGE employees conducting shallow temperature probe survey

Future Exploration

- Site (Catex) – Drill Shallow and Intermediate/Deep Slim TGH
- 3rd Party Geothermal Resource Assessment
- Develop Marketing Video on HWAD for potential developers
