

# Nevada Army National Guard

# NVARNG Super Solar Phase 1

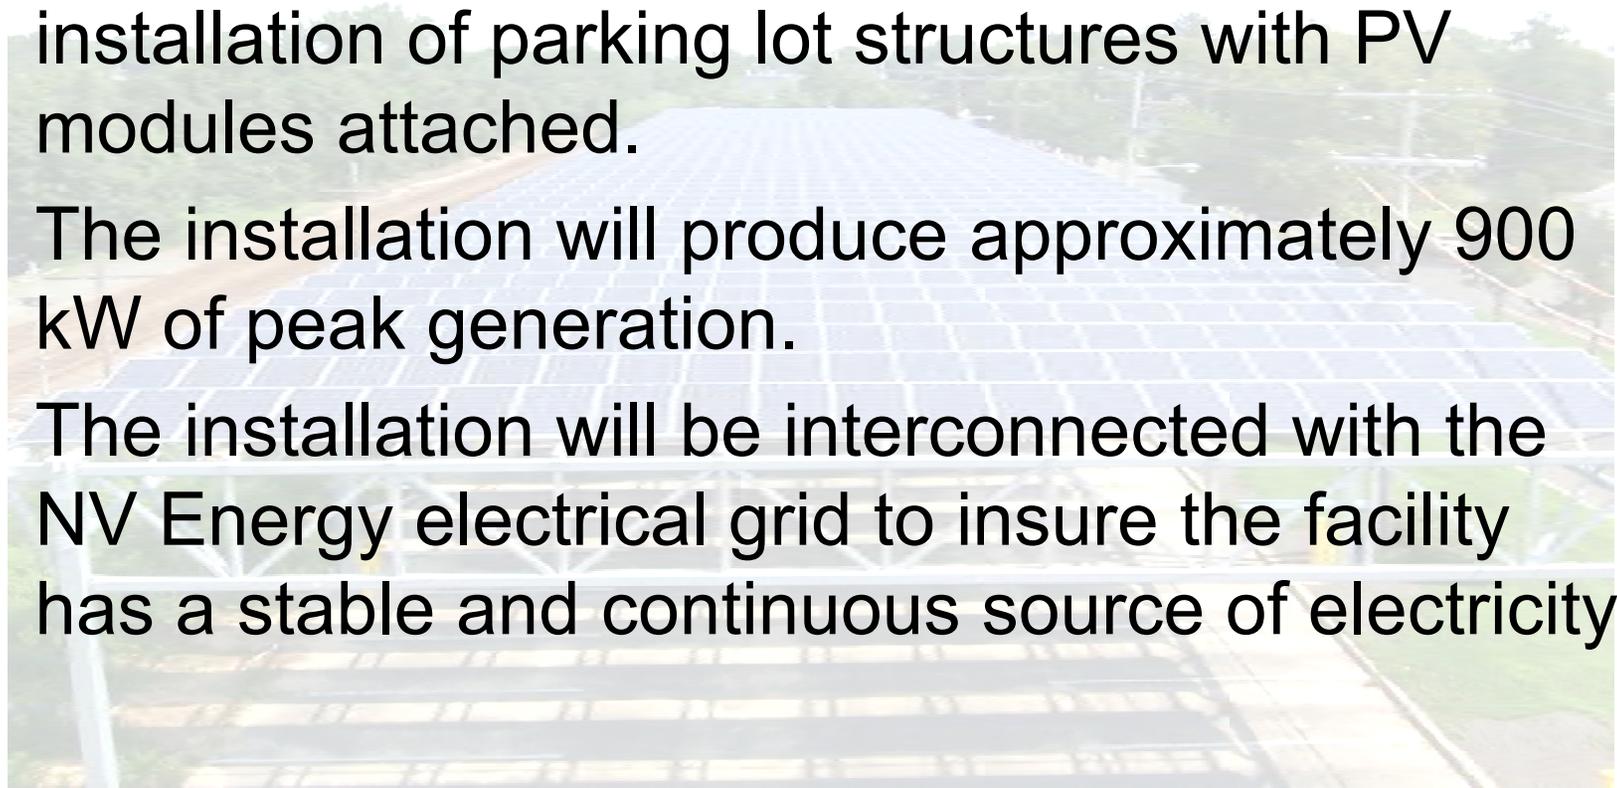

- Three sites; Carson City, Las Vegas
- 3.4mw Solar PV on parking structure
- 20 yr PPA at fixed rate
- Covered shaded POV parking for soldiers
- The Guard achieves 60% energy sourced from renewable, well exceeding RPS 25%

# Project Scope

- The Super Solar Project at LVRC will involve installation of parking lot structures with PV modules attached.
- The installation will produce approximately 900 kW of peak generation.
- The installation will be interconnected with the NV Energy electrical grid to insure the facility has a stable and continuous source of electricity.

# Questions?

NVNG BRP (Blue  
Ribbon Panel)

# NVNG BRP

Background: Governor Gibbons stood up the BRP last year with the first emphasis to focus on the Nevada Air National Guard (NVANG). With the completion and success of their charter, BG Burks directed the continuation of the vision and stood up the BRP focused on the Nevada Army National Guard (NVARNG).

# NVNG BRP

Purpose: Merge the results of both the NVARNG and NVANG BRP efforts to develop a vision to guide the organization through calendar year 2025.

# NVNG BRP

Timeline: Establish measurable milestones and formulate a comprehensive implementation plan by 31 May 2010.

# NVNG BRP

How do we do it: We want to focus on prioritizing recommendations that capitalize on the strengths of our centers of gravity and are complimentary and are linked to the core competencies of the DoD, DA, NGB, ANG and the NVARNG.

# NVNG BRP

What do we need: We are asking Military organizations within the State of Nevada to provide the NVNG with a copy of their Strategic Plans.
