

May 21, 2012

Ms. Breanne Potter
Assistant Commission Secretary
Public Utilities Commission of Nevada
1150 E. William Street
Carson City, NV 89701

RE: Initial Application of Boulder Solar Power, LLC for a Permit to Construct the Boulder Solar Power Project under the Utility Environmental Protection Act

Dear Ms. Potter:

Please find enclosed the application of Boulder Solar Power, LLC ("BSP"), for a Permit to Construct the Boulder Solar Power Project under the Utility Environmental Protection Act, pursuant to NRS 704.870(2).

BSP requests that the Commission accept this Initial Application under UEPA as complying with the statutory and regulatory requirements listed in the Application. BSP will submit an amended application once it receives the environmental analysis being prepared under the direction of the U.S. Bureau of Land Management.

If you have any questions about this filing, please do not hesitate to contact me at (702) 430-2016.

Sincerely,

Syndi Dudley, Ph.D., P.E.
Vice President

Enclosures: Initial UEPA Application
\$200 Application Fee

**PUBLIC UTILITIES COMMISSION OF NEVADA DRAFT NOTICE
(Applications, Tariff Filings, Complaints, and Petitions)**

Pursuant to Nevada Administrative Code ("NAC") 703.162, the Commission requires that a draft notice be included with all applications, tariff filings, complaints and petitions. Please complete and include **ONE COPY** of this form with your filing. (Completion of this form may require the use of more than one page.)

A title that generally describes the relief requested (see NAC 703.160(4)(a)):

Pursuant to the Utility Environmental Protection Act ("UEPA"), and the provisions set forth in Chapter 704 of the Nevada Revised Statutes, and Chapter 703 of the Nevada Administrative Code, Boulder Solar Power, LLC ("BSP") is filing an Initial Application with the Public Utilities Commission of Nevada for a permit to construct and operate a photovoltaic power facility to be known as the Boulder Solar Project (the "Project").

The name of the applicant, complainant, petitioner or the name of the agent for the applicant, complainant or petitioner (see NAC 703.160(4)(b)):

The applicant is Boulder Solar Power, LLC.
Syndi Dudley, P.E., with the Louis Berger Group, Inc. is the authorized agent for the applicant.

A brief description of the purpose of the filing or proceeding, including, without limitation, a clear and concise introductory statement that summarizes the relief requested or the type of proceeding scheduled AND the effect of the relief or proceeding upon consumers (see NAC 703.160(4)(c)):

Boulder Solar Power, LLC ("BSP") is filing its initial application for a permit to construct utility facilities to be known as the Boulder Solar Power Project ("Project Facility") pursuant to the requirements of the Utility Environmental Protection Act (NRS 704.820 *et seq.* ("UEPA")). BSP is developing the Project to produce up to 350 MW of clean, renewable electrical power to meet the growing demand for such power in Nevada and the southwestern U.S., and to satisfy state and federal renewable portfolio standards.

BSP will submit an Amended Application to the Commission, including the final environmental assessment, once it receives the environmental analysis prepared under the direction of the U.S. Bureau of Land Management.

A statement indicating whether a consumer session is required to be held pursuant to Nevada Revised Statute ("NRS") 704.069(1)¹:

A consumer session is not required.

¹ NRS 704.069 states in pertinent part:

1. The Commission shall conduct a consumer session to solicit comments from the public in any matter pending before the Commission pursuant to NRS 704.061 to 704.110 inclusive, in which:

- (a) A public utility has filed a general rate application, an application to recover the increased cost of purchased fuel, purchased power, or natural gas purchased for resale or an application to clear its deferred accounts; and
- (b) The changes proposed in the application will result in an increase in annual gross operating revenue, as certified by the applicant, in an amount that will exceed \$50,000 or 10 percent of the applicant's annual gross operating revenue, whichever is less.

If the draft notice pertains to a tariff filing, please include the tariff number AND the section number(s) or schedule number(s) being revised.

The draft notice does not pertain to a tariff filing.

BEFORE THE PUBLIC UTILITIES COMMISSION OF NEVADA

IN THE MATTER OF:

Initial Application of BOULDER SOLAR
POWER, LLC for a Permit to Construct A
Photovoltaic Solar Facility under the Utility
Environmental Protection Act

Docket No. 12-

**INITIAL APPLICATION of BOULDER SOLAR POWER, LLC
FOR A PERMIT TO CONSTRUCT A PHOTOVOLTAIC
SOLAR FACILITY UNDER THE UTILITY
ENVIRONMENTAL PROTECTION ACT**

A. Introduction

The applicant BOULDER SOLAR POWER, LLC ("BSP") through the undersigned agent, and in accordance with NRS 704.870(2), hereby files with the Public Utilities Commission of Nevada ("Commission") and Initial Application ("Initial Application") for a permit to construct a 350 MW photovoltaic solar facility (the "Proposed Facility"), as described below, pursuant to the requirements of the Utility Environmental Protection Act (NRS 704.820 *et seq.* ("UEPA") NRS 704.820 to 704.900, and NAC 703.415 to 703.427, specifically, NAC 703.421). The following information is provided in support of the application.

B. Background

The Proposed Facility is a 350 MW photovoltaic solar-powered electric generating facility which is proposed to be located on private land owned by the City of Boulder City, Nevada, and under lease to the Company Nevada (see Exhibit A, Site Location Map). BSP is developing the Proposed Facility to produce clean, renewable electrical power to meet the growing demand for

such power in the southwestern U.S. and to satisfy state renewable portfolio standards. The Proposed Facility will employ solar photovoltaic technology.

The Proposed Facility access road, potable water line, and transmission lines interconnecting the solar field with the Eldorado and/or McCullough Substation, cross transmission corridors within which the federal government asserts an easement interest. As a result of the federal governments easement interest, the U.S. Bureau of Land Management ("BLM") is requiring a review and analysis of the environmental conditions associated with the Proposed Facility pursuant to the National Environmental Policy Act ("NEPA"), 42 U.S.C. § 4321 *et seq.* Accordingly, an environmental assessment will be prepared for the Proposed Facility.

UEPA establishes a two-step application procedure for facilities subject to federal permitting and environmental review. This initial application is being filed pursuant to NRS 704.870(2)(a) which requires that the project proponent is file an application with the Commission that provides notice of the federal filing if a federal agency is required to conduct an environmental analysis of a proposed utility facility. The filing of the permit application with the Commission application is required not later than the date of which a permit application is filed with the federal agency. The UEPA Initial Application provides a general description of the proposed facility and a summary of any studies that the Company anticipates will be made of the environmental impact of the facility as required by NRS 704.870.2(a)(1) and (2). Subsequently, and not later than 30 days after the issuance of the final environmental document, the applicant is required to file an Amended UEPA Application with the Commission pursuant to NRS 704.870.2(b)(1).

This Initial Application, together with the Proposed Facility description and Exhibits A (Site Location Map), B (Regional Map), C (Legal Description), D (Federal Action and Environmental Studies), E (Public Notice), F (Proof of Publication), and G (Proof of Service to Clark County Clerk, Nevada State Clearinghouse and Other Agencies), all attached and incorporated herein by

reference, contain all of the information required to be filed at this time. Additional information will be provided through an Amended Application once the BLM issues the results of the environmental analysis of the Proposed Facility.

Accordingly, BSP requests that the Commission accept this Initial Application under UEPA as complying with the statutory and regulatory requirements set forth above. BSP will submit an Amended Application once it receives the final environmental analysis from BLM. At that time, the Company will seek approval from the Commission of its request for a Permit to Construct the Proposed Facility pursuant to NRS 704.890.

C. Name and Address of the Applicant

1. BSP is a Nevada limited liability company formed with the purpose of developing, owning and operating photovoltaic solar facilities.
2. BSP's principal place of business, mailing address and telephone number are:

Boulder Solar Power, LLC
5205 Durango Drive, Suite #102
Las Vegas, NV 89113
(702) 489-8585

3. All correspondence related to this Initial Application (copy of all pleadings, notices, orders and discovery requests) should be sent to the undersigned agent:

Syndi J. Dudley, Ph.D., P.E.
THE Louis Berger Group, INC.
500 E. Amigo Court, Suite 100
Las Vegas, NV 89119
Phone: (702) 430-2016
Fax: (702) 736-1457
sdudley@louisberger.com

D. Information required by NAC 703.421

Pursuant to NAC 703.421, BSP submits the following information:

1. General Description of the Location of the Proposed Facilities - NAC703.421(1)

The Proposed Facility will be located on private land owned by the City of Boulder City, Nevada and under lease to the Company. Transmission lines interconnecting the Proposed Facility to the Eldorado and/or Marketplace Substations land over which the federal government asserts an easement interest (see Exhibit A, Site Location Map). A regional map showing the location of the Proposed Facility is attached as Exhibit B. The legal description of the Proposed Facility is attached as Exhibit C. The Proposed Facility will encompass 1,550 acres, the transmission line 77 acres, and the access road 1.5 acres.

Factors that must be considered when identifying and evaluating potential sites for solar energy development include adequate solar resource, availability of suitable land, proximity to electrical transmission, and consideration of environmental, land use, and socioeconomic factors. Alternative site locations considered in siting the Proposed Facility included various locations in Boulder City. Alternative sites outside of Boulder City were constrained by availability and environmental conditions.

a) **Solar Resource** - The location of the Proposed Facility is one of the premier solar resource areas in the world. The valley's latitude, elevation, and percentage of annual cloud-free days make this area a preferred location for solar power generation.

b) **Availability of Suitable Land** - Boulder City has established a solar energy development zone which contains sufficiently sized contiguous tracts of land which are available for solar development pursuant to long-term leases with the City.

c) **Access to Bulk Transmission** - The Proposed Facility is located in close proximity to a number of substations, including Eldorado substation, which provides interconnection to the transmission grid.

d) Environmental, Land Use and Socioeconomic Considerations - The Proposed Facility is located within the Boulder City Solar Development Zone, an area which has been designated for solar development. Surrounding land is characterized primarily by commercial operations, power generation, energy transmission infrastructure, transportation infrastructure and open space. The site is located within approximately 20 miles of the Las Vegas metropolitan area, which is expected to provide an ample available construction workforce. The Proposed Facility is located near U.S. Highway 95, providing adequate transportation infrastructure for the site.

2. General Description of the Proposed Utility Facilities - NAC 703.421(2)

(a) The size and nature of the proposed utility facility.

The Proposed Facility will include the following main elements:

- Photovoltaic and/or Concentrated Photo voltaic Arrays;
- 230 kV transmission line;
- An operation and maintenance building with a parking area;
- An access road approximately 1,600 feet in length entering the property of U.S. Highway 95;
- A substation switchyard; and
- Perimeter Fence

Construction of the Proposed Facility will require the following temporary facilities. The following temporary facilities will be removed at the end of the construction period:

- A construction staging area.

(b) The natural resources that will be used during the construction and operation of the proposed facility.

The Company anticipates minimal uses of natural resources during construction and operation. Water will be utilized for dust control and panel washing in the following estimated quantities during construction: approximately 250 acre feet; during operation: 50 acre feet/yr.

The only other natural resources the Company anticipates using are those natural resources incorporated into construction materials (e.g., steel and concrete).

The following permits will be required for the Proposed Facility:

Permit/Required	Approving Agency
Finding of No Significant Impact / Record of Decision, following evaluation of Environmental Assessment	U.S. Department of the Interior, Bureau of Land Management
Endangered Species Act Section 7 Biological Opinion / Incidental Take Permit	U.S. Department of the Interior, U.S. Department of Fish and Wildlife
Clean Water Act Section 404 Non-Jurisdictional Determination	U.S. Army Corps of Engineers
National Historic Preservation Act Section 106 Finding of Eligibility	U.S. Department of the Interior, Bureau of Land Management; Nevada State Historic Preservation Office
Utility Environmental Protection Act – Permit to Construct	Nevada Public Utilities Commission
Nevada Division of Wildlife Scientific Collection Permit	Nevada Division of Wildlife
National Pollutant Discharge and General Stormwater Permit for Construction Activities	Nevada Department of Environmental Protection
Nevada Department of Transportation Right-of-Way Encroachment Permit	Nevada Department of Transportation
Hazardous Materials Permit / Roving Permit	Nevada Department of Public Safety, State Fire Marshal Division
Dust Control Permit	Clark County Department of Air Quality and Environmental Management
Installation Permit for Fire Detection and Protection Systems and/or Annual Permit	City of Boulder City Fire Development Department
Grading Permit	City of Boulder City Community Development Department

3. A summary of any studies which the applicant anticipates will be made of the environmental impact of the proposed utility facility, including a copy of all corresponding studies filed with appropriate federal agencies - NAC 703.421 (3)

This Initial Application describes the requisite federal agency approvals for construction of the Proposed Facility and presents a general description and summary of the studies that are anticipated as part of a final environmental assessment relating to the construction of the utility facility pursuant to NRS 704.870.2(a)(1) (see Exhibit D). All studies and supporting documents will be included in the final environmental assessment, which will be submitted to the Commission in the amended application pursuant to NAC 703.423.

4. A copy of the public notice of the application and proof of the publication of the public notice - NAC 703.421(4)

A copy of the public notice of this initial application is attached as Exhibit E. Pursuant to NRS 704.870.4(b) and NAC 703.421 (4), proof of publication of the public notice of this application in Clark County, Nevada is attached as Exhibit E. A copy of the Initial Application has been filed with the clerk of each local government affected by the location(s) pursuant to NRS 704.870(a) (see Exhibit G).

5. Proof that a copy of the application has been submitted to the Nevada State Clearinghouse - NAC 703.421 (5)

A copy of the Initial Application has been submitted to the Nevada State Clearinghouse (see Exhibit G).

F. Conclusion and Request for Relief

BSP will amend and supplement this application as permitted and contemplated pursuant to NRS 704.820 to 704.900 and NAC 703.415 to 703.427. Based on this Initial Application and any amendment or supplement thereto, BSP respectfully requests that the Commission proceed in the manner required by law and, in accordance with NAC 703.535(d), issue an order that:

- I. Grants a Permit to Construct the Proposed Facility, as described herein;

2. Grants such conditions and modifications that may allow for the issuance of the UEPA permit to construct or a compliance order with the condition that BSP may file any outstanding required permits, licenses or approvals with the Commission prior to commencing construction of the Proposed Facility pursuant to NRS 704.890;
3. Grants such deviations from the Commission's regulations as may be in the public interest; and,
4. Grants BSP such other and further relief as the Commission may find reasonable and appropriate under the circumstances.

DATED this 24th day of May, 2012.

The Louis Berger Group, Inc.
500 E. Amigo Court, Suite 100
Las Vegas, NV 89119

Federal Action and Environmental Studies

An environmental assessment (EA) will be completed for the lands comprising the Proposed Facility and the transmission line which will connect the Proposed Facility to the Eldorado substation. While only the transmission line is located on land upon which a federal interest is asserted, the entire facility including the solar array is being evaluated in the EA as a connected action.

The following resources have been or will be evaluated under the federal environmental review process:

- Geology, Soils, and Paleontology
- Groundwater and Surface Water Hydrology
- Air Quality
- Biological Resources
- Cultural Resources
- Land Use
- Transportation
- Visual Resources
- Soundscape
- Waste Management
- Socioeconomics
- Cumulative Impacts

**BEFORE THE PUBLIC UTILITIES COMMISSION OF NEVADA
NOTICE OF APPLICATION FOR A PERMIT TO CONSTRUCT UTILITY
FACILITY UNDER THE UTILITY ENVIRONMENTAL PROTECTION ACT**

Boulder Solar Power, LLC (the "Company") is submitting, pursuant to the Nevada Utility Environmental Protection Act ("UEPA"), an application to the Public Utilities Commission of Nevada (the "Commission") for authority and a permit to construct the Boulder Solar Power Project, a photovoltaic power plant, under Nevada Revised Statutes, Chapter 704, Sections .820 to .900, and Nevada Administrative Code, Chapter 703, Section 415 to 427. The Boulder Solar Power Project will be located within Clark County approximately 20 miles south of Las Vegas, Nevada on approximately 1,540 acres of land within the city limits of Boulder City, Nevada.

This Boulder Solar Power Project is being undertaken to generate up to 350 megawatts of new electric power to provide reliable electric power consistent with federal and state renewable energy portfolio objectives; and will include (1) a new solar power plant with a nominal generating capacity of approximately 350 MW; and, (2) 230 kV transmission line connecting to the Eldorado and/or McCullough Substation.

The BLM will conduct a thorough environmental analysis of the Boulder Solar Power Project, pursuant to the National Environmental Policy Act, and analyze the environmental impacts of the scope of the project and make a determination on whether or not to authorize the right-of-way grants for the transmission line and access road portions of the project.

The contents of the Initial UEPA Application will include, but are not limited to:

1. A general description of the location of the proposed facility, including (a) a regional map that identifies the location of the proposed utility facility, (b) any alternative locations for the proposed utility facility, and (c) the reasons why the location is best suited for the proposed utility facility;
2. A general description of the proposed utility facility, including, (a) the size and nature of the proposed utility facility, and (b) the natural resources that will be used during the construction and operation of the proposed utility facility;
3. A summary of any studies which the applicant anticipates will be made of the environmental impact of the proposed utility facility, including a copy of all corresponding studies filed with appropriate federal agencies; and
4. A description of how the utility facility and related transmission facilities will aid in providing customers with reliable service and will serve the public interest.

A copy of the application will be available on the Commission's website following the Company's filing of the application. Additional information about the UEPA process and a person's right to participate in that process can be found in Nevada Revised Statutes and Nevada Administrative Code Chapters 703 and 704.
