Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA), the BLM will prepare an EIS and conduct public scoping meetings on the withdrawal from the mining law of approximately 10 million acres of BLM- and United States Forest Service-administered public lands, in 6 western states as identified in the *Federal Register* notice of September 24, 2015 (80 FR 57635). The EIS will consider a No Action alternative and consider reasonably foreseeable mineral development activities. The EIS does not support a land-use plan or a land-use plan amendment. It will provide a comprehensive programmatic NEPA analysis for the proposed action of the Secretary of the Interior withdrawing these public lands from operation of the mining law for the conservation benefit of the Greater Sage-grouse.

The BLM has initially identified the following issues for analysis in this EIS: Air quality/climate, American Indian resources, cultural resources, wilderness and wilderness characteristics, mineral resources, public health and safety, recreation, social and economic conditions, soil resources, soundscapes, special status species, vegetation resources, visual resources, water resources, and fish and wildlife habitat.

In addition, the BLM expects to address economic effects of withdrawing these public lands from operation of the mining law, wildlife habitat conservation; improvement, restoration of ecosystem processes; protection of cultural resources, watershed and vegetative community health, new listings of threatened and endangered species and consideration of other sensitive and special status species.

Steve Ellis,
Deputy Director, Bureau of Land
Management.
